Safety Data Sheet (SDS)

1. PRODUCT AND COMPAN	Y IDENTIFICATION
Material Name	: Shell Ondina Oil 15
Recommended Use	: White mineral oil.
Restricted Use	
	: Other than those above.
Manufacturer/Supplier	: Shell Lubricants Japan K.K.
	1-11-1 Marunouchi, Chiyoda-ku, Tokyo, 100-6212 Japan
Telephone/Fax	: Tel.0120-064-315/Fax.0120-264-315(customer service center)
	mber : same as above. (Japanese office hours only)
Contact for Safety Data Sl	
SDS Code	: 001J7744
SDS Code	. 00137744
	N1
2. HAZARDS IDENTIFICATIO	
GHS Classification : Asp	iration hazard: Category 1
GHS Label Elements	
Symbol(s) :	A
	52/
	$\mathbf{\nabla}$
Signal Words : Dan	
	4: May be fatal if swallowed and enters airways
GHS Precautionary Stateme	
Prevention : No p	precautionary phrases.
Response : P30	1+P310: IF SWALLOWED: Immediately call a POISON CENTER/doctor/physician.
	1+P331: IF SWALLOWED: Do NOT induce vomiting.
	5: Store locked up.
	1: Dispose of contents/container to appropriate waste site or reclaimer in accordance
	local and national regulations.
Unclassified Hazard : Plea	ase see Section 4 - 8 before use for Prevention/Response/Storage/Disposal.
Information Use	d oil may contain harmful impurities.
3. COMPOSITION/INFORMA	TION ON INGREDIENTS
Substance or Mixture	: Substance(UVCB: Unknown or Variable composition, Complex reaction products
	and Biological materials)
Chemical Description	: Lubricating oil.
Component Information	: Lubricant base oil (White mineral oil) 100%
Chemical Formula	: Not possible to define.
CAS registry number	: Trade secret
Additional Information	: If product contained highly refined mineral oil, it contains <3% DMSO-extract,
Additional information	
	according to IP346.
Pollutant Release and Trans	ster : Not applicable
Register (PRTR) Law	
Industrial Safety and Health	: Not applicable
Law	
Poisonous and Deleterious	: Not applicable
Substance Control Law	. For approable
	te
Classification of component	
according to GHS	Low viscosity base oil/Asp. Tox. 1/H304/100%
I he specific chemical identitie	is and percentages of composition have been withheld as trade secrets.
4. FIRST AID MEASURES	
General Information	: Not expected to be a health hazard when used under normal conditions.
Inhalation	: Remove casualty to fresh air and keep at rest in a position comfortable for breathing.
IIIIaiation	
	Cover with blanket to keep warm and rest in a quiet surrounding. Seek immediate
	medical advice and attention.
Skin Contact	: Wash skin with large amount of water using soap.
Eye Contact	: Rinse cautiously with clean water for several minutes. Remove contact lenses, if
-	present and easy to do, and continue rinsing. After rinsing for a minimum of 15
	minutes, seek medical advice and attention.
Ingention	
Ingestion	: Without inducing vomiting, call a doctor for treatment. If mouth has been dirtied, clean
	with water.
Most Important	: If swallowed, may irritate mucous membrane of stomach and induce vomiting.
Symptoms/Effects, Acute	Inhalation if mist may cause feeling ill. Skin contact and eye contact may cause
& Delayed	irritation.

Immediate Medical
Attention, Special
Treatment

: Treat symptomatically. Call a doctor or poison control center for guidance.

5. FIRE FIGHTING MEASUR	RES
Clear fire area of all non-eme	ergency personnel.
Suitable Extinguishing Media	: Concentrated strong liquid in mist and powder forms, carbon dioxide and foam. Use powder and carbon dioxide may be used small fires only. Effective to use foam to shutdown the air in a large fires.
Unsuitable Extinguishing Media	: Do not use water in a jet.
Specific Hazards Arising from Chemicals	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds
Fire fighting instructions	: Water the surrounding equipment to cool them down. Cordon off the affected place and its vicinity to all, except the concerned parties.
Protective Equipment & Precautions for Fighters	: Ensure to wear protective equipment and approach from windward.
6. ACCIDENTAL RELEASE	
	released material. For guidance on selection of personal protective equipment see Section 13 for information on disposal. Observe the relevant local and international
Personal Precautions, Protective Equipment and Emergency Procedures	: Avoid contact with skin and eyes. Prepare suitable equipment and materials.
Environmental	: Use appropriate containment to avoid environmental contamination. Prevent from
Precautions	spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. In event of entering in the sea, extend oil fences to prevent from spreading, and sop up with absorbent materials. Use chemicals and/or detergents, they must satisfy technical standards as set by the Ministry of Land, Infrastructure and Transport / Ministry of the Environment.
Methods and Material for Containment and Clean Up Additional Advice	 Promptly remove all ignition sources and stop leakages. In a small leakage, absorb and recover by use of soil, sand, sawdust and waste clothes. In a large leakage, cordon off the danger zone, prevent from entering and enclose it with sand bank and stop outflow. Cover liquid surface with foam, and recover liquid into containers. Local authorities should be advised if significant spillages cannot be contained.
7. HANDLING AND STORAG	GE
HANDLING	
Technical Measures	: In handling this material over the allocated volume, ensure approval to meet requires of the laws. Keep away from heat, sparks, open flames, hot objects. No smoking. Take measures against static discharge. Ensure to wear clothing and shoes made of conductive materials. When fixing or processing machine, it carries out after removing dangerous objects completely. NEVER suck up (siphoning) this material by mouth. Wear suitable protect equipment if skin or eye contact may cause. Seal containers hermetically without handling in violent such as falling, dropping, or jolting.
Ventilation Precautions Precautions for Safe Handling STRAGE	 see Section 8 Use under normal temperature. Prevent from mixing water and impurity. Avoid contact with halogens, strong acids, alkali and oxidizing materials.
Conditions for Safe Storage Technical Measures	 Keep containers tightly closed and in a cool, well-ventilated place away from direct sunlight. It is recommended to lock up storage area. Use properly labelled and closeable containers. Avoid heat, sparks, open flame and static accumulation. All electrical appliances shall be explosion-proof types, and they all must be earthed.
Precautions for Safe Stroage Recommended Materials	 Avoid contact and storage in same place with halogens, strong acids, alkali and oxidizing materials. Storage in original containers. Do not pressurize empty containers. May cause rupture. Do not weld, heat up, drill or cut containers. May ignite the residue and cause explosion.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only.

Equipment	: Seal or install ventilations for mist occurs. Install eye shower and body shower near
	working site.
Standard Concentration	: Not specified

Standard Concentration Control

Sh	ell Ondina Oil 15 Code:001J7744 Date:May 1, 2022 Page:3/5	
OSHA, Permissible Exposure Limits (PEL)	: 5mg/m ³ (as Oil mist, mineral)	
Occupational Exposure Limits	: Japan Society for Occupational Health(2018) ⁽¹⁾ Data not available. ACGIH(2018) TWA[Inhalable fraction.] ⁽²⁾ Data not available.	
Protective Equipment	: Skin protection not ordinarily required beyond standard issue work clothes.	
Respiratory Protection	: No respiratory protection is ordinarily required under normal conditions of use. Use appropriate equipment in response to the circumstances.	
Hand Protection Eve/Face Protection	: Use oil-proof protective hand gloves under prolonged or repeated skin contact. : Wear safety glasses or full face shield if splashes are likely to occur.	

Lyen ace i rolection	
Skin and Body	: Use oil-proof/long sleeved clothing under prolonged usage.
Protection	
Appropriate Sanitary	: Remove immediately all contaminated clothing. Contaminated clothing must be
Measures:	laundered before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES	
Physical state	: Liquid at room temperature.
Colour	: Colourless. Clear.
Odour	: Characteristic mineral oil.
рН	: Not applicable.
Melting/freezing point	: Pour point: ≤ Approx10°C
Boiling point, initial boiling point and boiling range	: Expected >200°C
Flash point	: ≥ 130°C (COC) (typical ≥ 160°C)
Flammability	: Capable of catching fire.
Upper/lower Flammability or Explosion limits	: Typical 1 - 10 %(V) (based on mineral oil)
Vapour pressure	: Data not available.
Density	: Approx. 0.85g/cm ³ (15°C)
Solubility	: Water: Negligible.
Partition coefficient n-octanol/water	: Data not available.
Auto-ignition temperature	: Data not available. Expected >320°C
Decomposition Temperature	: Data not available.
Kinetic viscosity	: Approx. 16mm ² /s(40°C)
Relative vapour density	: Data not available.
Particle characteristics	: Data not available.

10. STABILITY AND REACTIVITY Chemical Stability/ : Stable under normal condition. Reactivity **Hazardous Reactivity** : Avoid contact with strong oxidizing agent. Conditions to Avoid : Avoid contact with halogens, strong acids, alkalis, and oxidizing materials. **Incompatible Materials** Data not available. **Hazardous Decomposition** : Hazardous decomposition products are not expected to form during normal storage. **Products** Generates smoke, carbon monoxide, sulfurous acid gas etc. during combustion. **11. TOXICOLOGICAL INFORMATION** Information given is based on data on the components and the toxicology of similar **Basis for Assessment** products. Unless indicated otherwise, the data presented is representative of the main component of a whole product, rather than for individual component(s). Individual components contained above cut-off value is described on Section 3. Expected to be of low toxicity: $LD_{50} > 15,000 \text{ mg/kg}$, Rat **Acute Toxicity** 1 Oral 2 Dermal Expected to be of low toxicity: $LD_{50} > 5,000 \text{ mg/kg}$, Rat 3 Inhalation(Vapour) Data not available 4 Inhalation(Mist) Data not available Skin Corrosion/Irritation : Not classified as a skin irritation (rabbit test). Serious Eve Not classified as an eye irritation (rabbit test). Damage/Irritation **Respiratory or Skin** : No data available concerning respiratory sensitisation. Sensitisation Not classified as a skin sensitiser (pig test). Germ Cell Mutagenicity Data not available. Highly refined mineral oils are not classified as carcinogenic by the International Carcinogenicity Agency for Research on Cancer (IARC monographs: Group 3). White mineral oils are the higher degree of refining and not classified as a carcinogen. **Reproductive and** : Not classified as a Reproductive and Developmental Toxicity (rabbit test, 4,350mg/kg-**Developmental Toxicity** bw/day, 5days a week, 13weeks) Specific target organ : Not expected to be a hazard. toxicity **Aspiration Hazard** : Classified as a hydrocarbon with kinetic viscosity < 20.5mm2/s measured at 40°C. To be reagrded as if they cause human aspiration toxicity hazard.

12. ECOLOGICAL INFORMA	TION	
Basis for Assessment	Ecotoxicological data have not been determined specifically for this product.	
	Information given is based on a knowledge of the components and the ecotoxicology of	
	similar products.	
	Unless indicated otherwise, the data presented is representative of the main component	
	of a whole product, rather than for individual component(s). Individual components	
	contained above cut-off value is described on Section 3.	
Caution	: Poorly soluble mixture. May cause physical fouling of aquatic organisms.	
Acute Aquatic Toxicity	: Fish Practically non toxic: LC50>10,000mg/L (Lepomis macrochirus, 96hrs)	
Chronic Aquatic Toxicity	: Not expected to be a hazard.	
Mobility in soil	: Generally floats on water.	
,	: Lubricating oil components have estimated log Koc >3, indicating these components	
	are likely to be adsorbed onto soil and sediment and are not likely to leach to ground	
	water.	
Persistence/degradability	: Data not available	
Bioaccumulative Potential	: Data not available	
Hazardous to ozone layer	: Not classified because this product not contained substances listed on Montreal	
· · · · · · · · · · · · · · · · · · ·	Protocol and Ozone Layer Protection Law.	
	······	
13. DISPOSAL CONSIDERA	TIONS	
Material Disposal	1 Waste disposal yourself or entrust the industrial waste treatment company who	
	obtained the prefectural governor's permission or municipal corporation. Disposal	
	should be in accordance with applicable regional, national, and local laws and	
	regulations.	
	2 Do not dispose into the environment, in drains or in water courses.	
	2 Do nor dispose into the environment, in dramits of in water courses.	

- 3 For landfill disposal, destroy by fire and confirm cinders agreed to Waste Disposal Law.
- 4 In event of burning this material, ensure to carryout work in safe place with guards in position, and select a method that would not cause any harm or damage to others during combustion or explosion.
- **Container Disposal** : Purify and recycle or performs suitable disposal in accordance with the standard of related laws and regulations. Disposal with remove content completely.

14. TRANSPORT INFORMATION International Restriction UN Class, Shipping Name UN Number international Restriction Warine Pollutant international Restriction Since domestic laws and regulations shown below are applicable, containers and transportation methods shall be required to follow each and every regulation. Land Fire Service Law: Container: If product classified as dangerous goods, use containers (other than tanker, tank car and tank truck) for transportation usage, shall meet the Clause 2, Notice Attachment 3, concerning dangerous materials. Sea Ship Safety Law: Not Dangerous Goods. Air : Civil Aeronautics Act: Not Dangerous Goods. and conditions for transport time markably with containers may not cause friction or agitation. 3 Display signage on vehicle and provide with fire fighting equipment, if and when required to transport more than the specified quantity. Total piled height of vehicle shall be less than 3 meters. 4 Consolidation of this material with dangerous goods belonging to the 1st and 6th Classification is prohibited. 5 Abide by other laws and regulations that are applicable.

Safety Data Sheet (SDS) about hazardous chemical is provided for a entrepreneur as reference information for safety handling. Refer to this document and perform suitable handling. Nothing in this document shall reduce the user's responsibility to satisfy itself as to the suitability, accuracy, reliability, and completeness of such information for its particular use. There is no warranty against intellectual property infringement. The information contained in this document is based upon data believed to be reliable through our supply chain at the time. So, we could not guarantee all about the contents. This document is based on JIS Z7253:2019/JIS Z 7252:2019, and is not a guarantee of safety. Contents of SDS updated periodically. SDS compliance is required as a rule to all business enterprises engaged in transaction of chemicals (including products containing them) with other businesses. Retailer/ Wholesaler must provide newest SDS to customers.

[SDS Request] As a rule, the direct delivery entrepreneur must provide the newest SDS to customer. Please contact not directly manufacturer but your supply chain company.
